

RAKES

Skid Steer Attachment

DIGGA HARLEY RAKE

Pulverise and prepare seedbed, de-thatch or remove old lawns and weeds all with one tool. Other jobs include cutting drainage grades, skim passes for over-seeding and preparing and conditioning job sites for seeding.

KEY FEATURES:

- Single Hydraulic Motor
- Pure Carbide Teeth for Longer Life
- Dual Independently Adjustable Gauge Wheels
- Adjustable Urethane Barrier
- Slews for Windrowing Debris

HIMAC DOZER RAKE

Perform dozing and levelling work as well as efficient vegetation control with the one attachment! What's more it only takes 20 seconds to hook the blade section on and off. Just line it up, crowd forward, hook up and then secure with one pin each side. It's that easy!

KEY FEATURES:

- Incredible Versatility - Use Rake With or Without Blade
- 155 mm Tyne Spacings, Side Wings and Rear Stabilisers
- Blade Section Features a Tough Replaceable Bolt-On Cutting Edge
- Includes Securing Pins
- Universal Skid Steer Mount as Standard

HIMAC FORK STICK RAKE

The Himac stick rake is a unique skid steer attachment designed for clearing land, fence lines, debris and other vegetation. The spacing between its tynes provides excellent sifting to minimise waste and maximise productivity.

KEY FEATURES:

- Robust Construction with Side Wings
- Ideal For Clearing Vegetation, Fence Lines... Etc
- High Grade Steel Tynes
- 155 mm Spacing Between Tynes
- 900 mm Height
- Maximum Sifting Ability
- Rear Tyne Stabilisers for Support When Standing

Specifications	Unit	Standard	Heavy
Tynes	mm	(1800 - 2100): 16	(1800 - 2400): 20
