

Digga Augers

The Digga 8 Series Augers come in a Rock/Combo (RC8) or Dedicated Rock version (DR8). The RC8 has a double flight configuration and a heavy duty body for greater strength. The DR8 flighting encourages regular removal of spoil, allowing cool air to enter the hole and regular inspection of teeth.

KEY FEATURES

- Tru-cut design ensures a 300mm auger drills a 300mm hole
- Drive adaptors and extensions to maximise drilling depth
- Shallow pitch flights for optimum removal of spoil
- Robust auger body construction for long life
- Variety of hub options

	Unit	RC8	DR8
Drilling Conditions	General	COMBO EARTH & ROCK	DEDICATED ROCK
