

## Robi Pulverisor

The Robi Pulverisor has been designed to accomplish hazardous tasks due to its purpose designed cutting blades for reinforcement, or small structure cutting. It is suitable for applications where material has been transported to a separate area and then requires cutting.

Convex Shape of Breaker

Easy to Change Tooth Design

Large Opening

Cutting Blades

### KEY FEATURES

- Long, turnable cutting blades
- Large opening enables the pulverization of big pieces of material.
- Optimum pulverizing geometry
- Optimized, easy to change, tooth design
- High quality wear resistant steel
- High operating speed

### WHAT'S INCLUDED

Standard Pins

Hoses
