

Auger Torque Trencher

The Auger Torque Trencher has the reliability and power to ensure trenching is carried out with ease. The chains are available in different configurations, whether you are trenching in soft ground or mixed ground. With the precision depth control skid, the operator can accurately set the desired trench depth.

KEY FEATURES

- 3 different tooth configurations, which are suitable for dry, soft, medium or hard earth and asphalt
- 6 different trenchers, all with 3 pre-set depths
- Variety of cutting widths available
